

Versino AG has been a leading provider of the ERP software SAP Business One since 2003. With more than 100 colleagues in Germany, Austria, Switzerland and the Czech Republic, we serve more than 500 customers in over 45 countries worldwide from 15 locations. We inspire our customers with a complete service consisting of consulting, development and support.

Join us at our headquarter in **Altötting, Bavaria** or at our newly founded location in **Sofia, Bulgaria** as

## **SAP BTP Developer (m/w/d)**

### **Your task**

- You develop and support integration scenarios based on the SAP Business Technology Platform (BTP).

### **Your profile**

- You have completed a degree in computer science or business informatics or an apprenticeship as an IT specialist or have acquired comparable knowledge. Career changers with several years of programming experience are also welcome.
- You have initial experience with integration platforms such as SAP BTP.
- You are experienced with web-based interfaces (OData, REST).
- You bring experience with programming languages such as Javascript, TypeScript, NodeJS.
- You have already worked with UI frameworks such as OpenUI5, ReactJS or AngularJS.
- You have experience with software engineering processes in the area of CI/CD.
- Experience with SAP ERP systems such as S4HANA, Business By Design or Business One is desirable.

### **What we offer you**

- If you bring commitment and initiative, you can expect challenging tasks with a lot of freedom and very good development opportunities.
- Ongoing training at SAP for SAP BTP and other SAP products.
- Flexible working hours and the possibility of working from home.

**Please send your application documents by post or email to:**
